

STONY PLAIN SUN.

VOLUME SIX

STONY PLAIN, ALBERTA, THURSDAY, NOV. 5, 1925.

The NEW RADIO

The Radio Sensation of the Year!

We are Radio Headquarters. Here you are supplied with complete service, sound advice and complete satisfaction.

HEAR the new Deforest & Crosley R-3 and you'll renew your first wonder at the miracle of radio. Tone so pure, so realistic that it's uncanny. Simplicity of operation such as has never before been attained in radio. You get the programme you want as simply as pressing a button, give you electric light. No howls, squeals, or discordant noises. A rich, two-tone mahogany cabinet (enclosing all batteries and wiring), worthy of the best setting. Price \$175—complete with 3 Westinghouse Radiotrons, Mission Headset, etc.—the only extras necessary are Antenna Equipment and Batteries. Easy payments if desired. Ask to hear it—no obligation to buy.

The Election Summary

The general elections last week resulted in an apparent victory for the party led by Right Hon. Arthur Meighen. When the returns were counted up, it was assumed that Mr. Meighen would be called on to form a government, his group having the larger number of representatives who were successful at the polls, but news from Ottawa now says that no change of government is impending.

Premier King, who was defeated in his own constituency, plans to secure a seat for himself, and it is claimed that so long as the Conservatives lack the 123 seats necessary to give them a majority of one, King proposes to hold on and meet Parliament, and let it decide.

Reliance evidently is placed upon the 20 Progressives and others to pull the Liberals thru for at least another session. The probability of a renewed general election is very evident at present.

Conservatives claim that the Government having suf-

Calendar.

- November—
- 6—Hulga Anderson's orchestra, Holburn Hall.
- 6—Juga Councillors meet in Stony Plain.
- 7—U.F.A. Local meets.
- 7—Conservative Convention in Stony Plain.
- 9—Thanksgiving Day.
- 10—Masquerade dance, Rosen Hall.
- 11—Women's Institute meet.
- 11—The play "Strictly Business" at Brighton School.
- 11—Auction sale at Val Knak's farm, 2 miles south of Stony.
- 13—Rosen's Auction Sale at Glory Hills.
- 13—"Voice of Authority," a play by the Girls' Club.
- 15—Lecture by Prof. Rohwinkle in Stony Plain.

fered the defeat of nine of its ministers, and being an inferior group, should resign out of respect to the evident will of the electorate.

Well posted politicians say that the difficulties Meighen would encounter in carrying on a government would be well-nigh insurmountable, but it was first thought that he would at least be given the opportunity.

The outcome of the situation will be awaited with interest.

The result of the poll showing the probable standing of the parties in the next House of Commons to be as follows: Conservatives 116, Liberals 104, Progressives 20, Labor and Independent 5.

In Stony Plain the result was: Stewart 87, Douglas 57, East 27.

Monday next is Thanksgiving Day, and a Public Holiday. All the places of business in Stony Plain will be closed.

LOCAL NEWS.

Messrs. Joe Miller and Duchoke returned from the hunting grounds on Tuesday night, each with a moose.

Carl Fiver was in Inverness Scotland this week, and expressed surprise at seeing a bunch of natives there with arms longer than their legs.

Messrs. A. J. Shaul and A. Propp headed a party of big game hunters bound this week for the foothills.

Messrs. L. Kimberley and Jas. McKenzie leave shortly for the North, on a hunting trip.

Crawford the Movie-man gave a very good run of pictures at the local hall Friday night.

A meeting of Stony Plain U.F. Local is called, for Saturday evening next, in the Royal Parlor.

The Ladies' Aid of the Union church of Stony Plain will present their play "Strictly Business" at Brighton schoolhouse, Wed. Nov. 11, at 8 p.m. Adults 50c, children 25c.

The Women's Institute will meet at the home of Mrs. F. W. Landy on Thurs. Nov. 10. The speaker for the afternoon will be Mrs. S. C. Elliot, and her subject will be "The Life and Work of Rudyard Kipling."

There will be a big gathering of Conservatives in Stony Plain on Saturday next, Nov. 7, on the occasion of the convention of the Conservative association. A candidate for the Assembly will be chosen.

Hallowe'en was observed Saturday night by the local juveniles in the usual manner, but the pranks mostly were of a harmless nature. The Sun windows presented a splendid field for the decorators, and these were attended to. The attempt to place an objectionable building in front of the Postoffice, as in days of yore, was frustrated by the Police.

Juga Councillors meet in Stony Plain tomorrow, Nov. 6th.

You are specially asked to remember that Wednesday, Nov. 11th is Armistice Day. Earlier in the week Poppies will be sold all over town, and from house to house, to be worn on Wednesday.

Mr. Brooks bought a carload of horses up from Vermilion District last week, which proved to be pretty good stuff, and which brought good prices by private treaty, the last team 2 greys, going Saturday for \$180.

Four cars of hogs and two two cars of stock left Stony last week. Cattle-buyer Slade is arranging for another shipment of stock this week.

An Essentially Canadian Industry. Fur Farming Is Developing At Rapid Rate, East And West

Fresh indication is continually being given of the remarkable growth in which Canada's newest industry, that of fur farming, is its broadest conception, is taking upon the popular imagination and enlisted their followers as well as periodically broadening the scope of its activities. With surprising frequency and momentum it is made of success attending the efforts to bring under domestication some new species of Canada's fauna, whilst a very gratifying number of individuals, envisioning the future status of the industry and the profits to be derived therefrom, are going to join the swelling army of Canada's fur farmers. Governments anticipating the same possibilities and recognizing the wisdom of intelligent development and early stabilization are "beginning to take steps for the encouragement of the industry and to put in effect measures for the achievement and maintenance of a high standard.

Prince Edward Island has been progressive in this regard, as is natural in the birthplace of the industry. A research experimental station, with special reference to foxes, has been established through the co-operation of provincial and federal governments to prosecute work for the benefit of fox breeders all over the Dominion. Ontario, according to recent announcement, has given its official endorsement to fur farming in a very practical manner. "It is to establish and operate a fur farm under expert supervision for the encouragement of the domestic rearing of all of the wild fur-bearing of the province." The aim of the government is to assist prospective fur farmers by educating them, creating a fund of valuable information for their use, and selling them really first-class stock for establishment. The provincial department of agriculture of Alberta has announced that it plans putting into operation a fur marketing service designed to meet the requirements of small operators for a medium of marketing, and which will not only serve the needs of trappers in the north, but those of Alberta's growing ranks of fur farmers.

Meanwhile signs of the expansion of the newer phases of the industry are to be observed on every hand. The popularity now rapidly achieved by muskrat farming has been almost sensational, and all over the country sections of marshland previously considered worthless, are being transformed into profitable muskrat ranches. The industry of chinchilla rabbit farming, so recently inaugurated, promises likewise to reach considerable proportions. Establishments for raising the little animal, imported from Europe and proven through experiments in Saskatchewan to thrive particularly well in the bristly Canadian climate and raise a richer, more valuable pelts than are now to be found in Ontario and British Columbia.

On the Pacific coast, and in fact throughout Western Canada, fur farming is exhibiting a remarkable growth. Residents of that broad territory, getting away from the mammoth conceptions of agriculture and entering more extensively into the smaller phases, have adopted the domestic rearing of fur-bearers with characteristic vigor and enthusiasm. On Vancouver Island, where less than eighteen months ago there were but half a dozen fur farms, there are now about forty. A similar popularity is to be observed throughout the prairie provinces.

Fur farming, as a broad, multi-phased activity, developing out of fox farming, is an essentially Canadian industry whose aim is not only to provide a source of income, but also to provide a source of income. Fur production will also become revolutionized, and instead of the pile of rich pelts which go from the Dominion all over the world being brought in from the Arctic tundras, they will emanate from small, intensive fur farms, raised by men living under the pleasant and social conditions.

A beautiful butterfly, found in the Fur district, England, has a scent gland in the top of its head. A scent gland of perfume is not a bad thing, is it? It is so wonderful that it drives away hostile insects.

W. N. D. 1921

Health Of Our Livestock

Good Progress Has Been Made in the Control of Disease

There is much of a comforting nature in the report for 1920-21 of the health of animals brought to the department of agriculture at Ottawa. The veterinary director general, Dr. George Hilton, in reviewing the contagious disease situation in Canada shows that the animal diseases that a few years ago were troublesome have been banished from the country. Rabies has not been detected in any part of Canada for years. No outbreaks of dourine has been reported among breeding horses for five years, and there is every reason to believe the infection does not exist in this country. Only one outbreak of anthrax was reported in the year, and that was in British Columbia and was brought speedily under control. The mauling is extremely rare in Canada. By vigorous action hog cholera has been practically eradicated. Suspected glanders not being promptly reported in unprogressive settlements of Alberta and Saskatchewan, action has been necessary and has proved effective, but close supervision is being kept to prevent recurrence. Eastern Canada and Manitoba are free of the disease. Prince Edward Island, New Brunswick, Quebec and British Columbia are free from mauling, but isolated cases are reported in Nova Scotia and Ontario. Manitoba, Saskatchewan and Alberta have had to have energetic attention, especially in the last-named province near the International boundary. All Canada has been practically free from sheep scab for many years.

Good progress is being made in the control of bovine tuberculosis. Livestock breeders, says Dr. Hilton, are now commencing to realize that it is poor business to maintain diseased herds and to purchase animals from questionable sources. When the report was published there were 1,675 fully accredited tuberculosis-free herds in Canada and 2,100 undergoing the process of accreditation.

There is also a tuberculosis-free area in the Carleton district in Manitoba, which is being dealt with under the restricted area plan. All cattle in an area comprising the counties of Huntingdon, Chateaugay and Beauharnois in the province of Quebec have also been tested by veterinary inspectors and reactors destroyed. There is every reason to believe that this area will be a tuberculosis-free area by the time the next annual report is issued.

The White Collar Job

The old idea that a white collar job at a low salary was better than an overall job at high wages has been abandoned pretty generally since the men, especially those with families, must have money, and they no longer feel that it is necessary to earn it in clean clothes. New York Herald-Tribune.

Sugar Beet Cultivation May Prove A Great Factor In The Prosperity Of Western Canada

Making Progress In Fight Against Rust

Saskatchewan Scientists Make Further Discoveries In Complicated Struggle

The rust work carried on for some years at the University of Saskatchewan is assuming new phases in the plant breeding experiments conducted in the cereal breeding section of the field husbandry department.

The end in view is a wheat that will have all the good qualities of the best strain of Marquis wheat which will also be highly resistant to all the rust strains found in Canada. During the past season a large number of crossings were made with Marquis on a highly rust resistant strain of Junellio. At Minnesota there has already been developed a highly rust resistant cross between Marquis and Junellio, which is known as Marquis-Junellio 44. This cross is of good quality, high yielding, combining in a high degree the milling qualities of Marquis, as well as the earliness and strength of straw, but the flour is too yellow to be satisfactory to the miller. It is hoped by back-crossing Marquis with Marquis-Junellio 44 that a strain may be produced which will have the flour color of Marquis combined with the rust resistance and other desirable qualities of Marquis-Junellio 44.

It will take many years and many hundreds of crosses together with careful selection and testing before the desired results are obtained. In undertaking these experiments the scientists in charge makes is very clear that he has no assurance that a high quality wheat immune to all rust strains may ever be discovered.

British Cattle Raisers Worried

Rust And Mouth Disease Has Again Broken Out

Cattle raisers are worried over a recurrence of the foot and mouth disease at several places. In England. Scarcely had the minister of agriculture's withdrawal of the last restriction dealing with the disease been announced when an isolated outbreak was reported. Since then there have been several others.

The restrictions have been relaxed in some places, notably Manchester, where hundreds of cattle and sheep are brought in from Wales and Westmoreland and slaughtered. Under the restrictions, any sheep or cattle coming in must be immediately slaughtered.

Only a few more weeks before winter is with us again. Better be looking up an old disease.

The new million dollar beet sugar refinery of the Canadian Sugar Factories Ltd. at Raymond, in Southern Alberta, has started operations, resulting in the resumption of a sugar beet industry in that territory under much more auspicious conditions than in the past. It is now evident that this new Alberta activity is away to a good start and, with the sureness of foundation, has great potentialities.

After exhaustive investigation and preparation United States interests entered the Southern Alberta field for the refining of sugar from beets in the spring of 1920. Promise was made to erect a sugar refinery at Raymond, in the heart of the irrigated districts, if farmers would contract for an average of 5,000 acres of beets. It is estimated that 7,200 acres have been signed up, and reports during the growing season were to the effect that stands were 90 per cent. perfect. The beet sugar crop in Southern Alberta, it is officially stated, is exceptionally good, and it would not be surprising if the tonnage produced reached 90,000 tons.

Such a successful year of inception opens up great possibilities for the beet sugar industry in Alberta and all Western Canada. The possibility of the industry from the agricultural standpoint in the area has never been in question, climate and soil being eminently suitable. Experimentation has proven an excess in both tonnage and sugar content in Southern Alberta production over that of the Western States.

Farmers in the area have become enthusiastic over the possibilities of the sugar beet and a much wider and more general interest has been created. Authoritative opinion has it that the acreage devoted to this crop next year will be 11,000 acres at least, and that by 1927 there would be sufficient beet sugar grown in Southern Alberta to necessitate the erection of another factory. The same authority predicted a time when there would be seventeen sugar factories in the section to take care of the crop.

This is a very gratifying development of the year's agriculture in Western Canada, regarded directly and indirectly. Apart from the revenue derived from the actual sale of the beets, for which a ready market is assured, an improvement in the general agricultural situation of the best growing districts is to be expected. From the development of a livestock industry and other phases, such as has been the experience of sections in the United States. Authorities are confident that it will prove one of the greatest factors in the prosperity of Western Canada, and there is every opportunity for expansion of the industry there.

Trees Worth Three Million

New York Girl Finds Tree Farming Is Profitable

Trees cannot, it is true, be made by posts, but they can be nurtured with such loving care and skill by someone who has studied them and understands their needs that they more than repay that someone in beauty and economic value.

Miss Evelyn W. Smith, of Amawalk, N.Y., has so far extended her father's cherished hobby—tree farming—that her estate at the foot of the Berkshire holds 1,000,000 trees, worth about \$3,000,000. For sixteen years Miss Smith has worked at her tree culture with patience and enthusiasm until today her nurseries are visited by admiring tree lovers, landscape architects and college forest specialists interested in the results of her experience.

The sturdy, beautiful Amawalk trees are as much in demand for summer houses and for landscape decoration. Only a short time ago a beech was sent to Belgium to express by a living symbol the friendship between the children of the two nations.

The Equinox Myth
In days gone by mariners looked for storms in the week following the 20th of September, this being the vernal equinox. Now scientists tell us that it is no more likely to be stormy at this period than at any other time during the early fall.—Fort Bowen News

Factors In Milk Contamination

Proper Procedure To Follow In Order To Produce Clean Milk

In the report of the comparatively recently organized division of bacteriology of the Dominion experimental farms, covering the year 1920, it is shown that the factors that stand out prominently in the contamination of milk are, first, carelessly cleaned pails, and, secondly, the health and cleanliness of the animal itself. Pails should be carefully cleaned and well dried. Care should also be taken to see that no dried manure particles get into the pail during milking. Dr. A. Grant Lockhead, the Dominion agricultural bacteriologist, who is responsible for the report, which can be had at no cost on application to the publication branch of the agricultural department, Ottawa, deals with other factors that are apt to cause milk contamination. Tests have been made at the central experimental farm to ascertain how the milk is affected and statistical tables are supplied showing to what degree milk may be contaminated by unsanitary conditions pertaining to the milker, beast, stable and utensils. A clean pail, a covered pail and a clean animal, speaking the doctor, are the big things in producing clean milk. A study is in addition given of bacteria producing a bitter flavor in milk, of the microbiology of frozen milk and of flax retting. Cleanliness is next to godliness in agriculture the same as in other things.

Record Movement Of Wheat

Grain Marketed on C.P.R. Lines at the Rate of Seventy-five Bushels Per Second

More than 10,583,763 bushels or about 80 per cent. of which has graded, of record, has been marketed in the prairie provinces during the month of September, according to railway reports. This is a record movement.

If all the wheat marketed during September along the Canadian Pacific Railway were hauled into bread and loaded on standard delivery wagons, each wagon containing one thousand loaves, and travelling at the rate of five miles per hour, it would take eight and a half weeks for these wagons to pass a given point. The marketing of grain on the C.P.R. in September amounted to 62,249,567 bushels. In twenty-five nine-hour working days this is at the rate of 75 bushels per second.

After a woman reaches the age of 30 it is impossible to convince her that the good old die young.

FORT GARRY ORCHESTRA FOR RADIO

Radio fans in Western Canada and the Western States, who frequently expressed their appreciation of the studio dance music programmes from Station CMBW in the Fort-Garry Hotel, Winnipeg, will this winter find a new orchestra catering to their enjoyment. Photograph shows the new Fort Garry Orchestra, headed by Mr. I.

A. Plummer, which has opened its winter engagement at this hotel, and which will be heard every Wednesday evening in both studio and dance sections from the new studio of CMBW, which is located in the Fort Garry. At Jasper Park Lodge during the summer months, Mr. Plummer's orchestra has been heard in the dance and social, with American and

Canadians, who stated that in their travels the vacation summer resorts on the continent, they had not found an orchestra which surpassed that of Jasper for either dance or concert numbers. The Fort Garry Orchestra will be broadcast every Wednesday evening, as it plays studio and dance numbers at the Fort Garry.

Lumber For the Orient
British Columbia Sending Heavy Shipments to Japan and China.
According to figures recently worked out by exporters, British Columbia is contributing about 20 per cent. of the lumber exports of the Pacific coast to the Orient and the Atlantic seaboard. Out of 60,000,000 feet of lumber being sent out on an average to Japan and China by the coast sawmills, British Columbia sawmills supply about 10,000,000 feet monthly.

BARRE, SON OF KAZAN
by
James Oliver Curwood
A LOVE EPIC OF THE FAR NORTH
Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog.
Is an Adaptation of This Story

SYNOPSIS
Nepeese, daughter of Pierrot, the trapper, carried Barre, the young wolf-dog, from her father's cabin in the woods. She was fearful of the return of McTaggart, the factor, whom, a few minutes before, she had pushed into a twenty-foot chasm when he made unwelcome advances to her. She met her father, who had learned that McTaggart had blood poison, the result of a bite on the hand by Barre when the factor found the dog in one of his traps.

CHAPTER XV.—Continued
It was not like other rains Barre had known. It was an Indian rain, sweeping down out of the blackness of the skies. Within five minutes the interior of the balsam shelter was a showerbath—half an hour of that torrential downpour, and Nepeese was soaked to the skin. The water ran in little rivulets down her back and breast; it trickled in tiny streams from her drenched braids and dropped from her long lashes, and the blanket under her was wet as a mop. To Barre it was almost as bad as the rain, the drowning in the stream after his fight with Papaychew, and he snuggled closer and closer under the sheltering arm of the Willow. It seemed an interminable time before the thunder rolled far to the east, and the lightning died away into distant and intermittent flashings. Even after that the rain fell for another hour. Then it stopped as suddenly as it had begun.

With a laughing gasp Nepeese flew to her feet. The water gurgled in her moccasins as she walked out into the open. She paid no attention to Barre, and he followed her. Across the open in the tree-tops the last of the stormclouds were drifting away. Nepeese looked down at Barre. He was standing calm and unshaken, with freedom on all sides of him. Yet he did not run. He was waiting, wet as a water rat, with his eyes on her expectantly. Nepeese made a movement toward him, and hesitated.

"No, you will not run away, Barre."

NERVOUS BREAK-DOWN

Pains in Back and Legs Relieved by Lydia E. Pinkham's Vegetable Compound

Ford, Ontario.—"I had a nervous break-down, as it is called, with severe pains in my back and legs, and with fainting spells which left me very weak. I was nervous and could not sleep nor eat as I should and spent much time in bed. I was in this state, more or less, for over two years before Lydia E. Pinkham's Vegetable Compound was recommended to me by my neighbor. Before I had taken five doses I was sitting up in bed, and when the first bottle was taken, was out of bed and able to walk around the house. During my sickness I had been obliged to get some one to look after my home for me but thanks to the Vegetable Compound I am now able to look after it myself. I have taken Lydia E. Pinkham's Blood Purifier in turn with the Vegetable Compound, and I certainly recommend these medicines to any one who is not enjoying good health. I am quite willing for you to use these facts as a testimonial."—Mrs. S. J. Jones, 130 Joe Janisse Avenue, Ford, Ontario.

Nervousness, irritability, painful times, run-down feelings and weakness are symptoms to be noted. Women suffering from these troubles, which they so often have, should give Lydia E. Pinkham's Vegetable Compound a fair trial. All druggists sell this medicine.

Treat Colds Externally

For sore throat, bronchitis or deep chest colds, rub Vicks VapoRub briskly over throat and chest and cover with warm flannel.
Vicks acts in two ways—both direct: absorbed like a liniment, and inhaled as a vapor. A quick relief for the cold troubles of all the family.

VICKS VAPORUB
Over 21 Million Doses Used Yearly

she was not like the beaver and the otter, and he was filled with this horrible relief when she came up.
So their first night passed—storm, the cool, deep pool, the big fire; and later, when the Willow's clothes and the blanket had dried, a few hours' sleep. At dawn they returned to the cabin. It was a cautious approach. There was no smoke coming from the chimney. The door was closed. Pierrot and Bush McTaggart were gone.

CHAPTER XVI.

It was the morning of August—the Flying-Moose when Pierrot returned from Lac Bain, and in three days more it would be the Willow's seventeenth birthday. He brought back with him many things for Nepeese—ribbons for her hair, real shoes, which she wore at times like the two Englishwomen at Nelson House, and chief glory of all, some wonderful red cloth for a dress. In the three winters she had spent at the Mission these women had made much of Nepeese. They had taught her to sew as well as to spell and read and pray, and at times there came to the Willow a compelling desire to do as they did.

So for three days Nepeese worked hard on her new dress and on her birthday she stood before Pierrot in a fashion that took his breath away. She had piled her hair in great glowing masses and coils on the crown of her head, as Yvonne, the younger of the Englishwomen, had taught her, and in the rich jet of it had had buried a vivid sprig of the crimson fire-flower. Under this, and the glow in her eyes, and the red flush of her lips and cheeks came the wonderful red dress, fitted to the slim and sinuous beauty of her body—the style had been two winters ago at Nelson House. Under the dress, which reached just below the knees—Nepeese had quite forgotten the proper length, or else her material had run out—came the hoop de maitre, of her toilet, red stockings and the wonderful shoes with high heels. She was a vision before which the gods of the forests might have felt their hearts stop beating. Pierrot turned his round and round without a word but smiling; but when she left him, followed by Barre, and limping a little in the tightness of her shoes, the smile faded from his face, leaving it cold and staring.

There was a change in Pierrot. During the three days of her dress-making, Nepeese had been quite too excited to notice this change, and Pierrot had tried to keep it from her. He had been away ten days on the trip to Lac Bain, and he brought back to Nepeese the joyful news that McTaggart was very sick with mch-poo—the blood-poison—news that made the Willow feel her hands and laugh happily. But he knew that the Factor would get well, and that he would come again to their cabin on the Gray Loon. And when next time he came.

It was when he was thinking of this that his face grew cold and hard, and

DANDRUFF
Rub the scalp with Minard's. It stimulates the roots of the hair, and removes dandruff.
MINARD'S LINIMENT
"KING OF PAIN"

his eyes burned. And he was thinking of it on this birthday, and even as her laughter floated to him like a song. Then, in spite of her seventeen years, she was nothing but a child—a baby! She could not guess his horrible visions. And the dread of awakening her for all time from that beautiful childhood kept him from telling her the whole truth so that she might have understood fully and completely. Non, it should not be that. His soul beat with a great and gentle love. He, Pierrot Du Quene, would do the watching. And she should laugh and sing and play—and have no share in the black forebodings that had come to spoil his life.

On this day there came up from the south, McDonald, the government map-maker. He was gray and grizzled, with a great, free laugh and a clean heart. Two days he remained with Pierrot. He told Nepeese of his daughters at home, of their mother, whom he worshipped more than anything else on earth—and before he was on quest of the last timberline of Banckian plain, he took pictures of Willow as he had first seen her on her birthday: her hair piled in glossy coils and masses, her red dress, the high-heeled shoes. He carried the negatives on a roll, promising Pierrot that he would get a picture back in some way. Thus fate works in its strange and apparently innocent way as it spins its web of tragedy.

(To be continued)

A WOMAN'S WORK IS NEVER DONE

No Wonder Health Gives Out and She Becomes Weak and Despondent

It is literally true concerning woman in the home that her work is never done. She starts with housework when she rises in the morning and is kept busy up to the time she retires at night. The work must be done whether she is feeling well or not. It is no wonder that she often breaks down under the strain. She becomes tired and with slight exertion feels exhausted if she walks upstairs. Headaches and dizzy spells become frequent and sleep is a burden. Much of this is due to the fact that her blood has become thin and watery, and to regain her good health she must take a reliable blood-purifying tonic such as Dr. Williams' Pink Pills. The great value of this tonic medicine is shown by the statement of Mrs. Mary Nolan, Lintlaw, Sask., who says: "When I began using Dr. Williams' Pink Pills was a physical wreck. It was with great difficulty that I could do light housework. I suffered from headaches, my heart would beat violently at the least exertion, and I always felt tired and depressed. I did not sleep well at night and I had no appetite; my limbs would swell as in dropsy. It was at this stage that a neighbor advised me to take Dr. Williams' Pink Pills. I had used the pills for some weeks before I began to feel their benefit, and thus encouraged I continued taking them for several months, when I was again as well as I had been for years. I have no hesitation in saying that these pills are a remarkable blood purifier and tonic, and I believe I shall ever be grateful for what they did for me."

You can get these pills from your druggist, or by mail at 60 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

King George Severe In Public Matters

But Easy Going In Private and Personal Affairs

Some of the Anger of the "Indiscretions," about which so much fuss has been made, have at least had the advantage of bringing out certain aspects of King George's character and personality which, perhaps, were not sufficiently known to the man in the street. One of these is the King's severe punctiliousness in everything relating to the public service, as contrasted with his easy-going good nature in all private and personal affairs. A blundering royal servant may count on the mildest and most good humored rebuke, while a minister or state official who offends stands a good chance of a smart rap over the knuckles from "the highest quarter." With King Edward—keen statesman as he was—was a little odder, though, the other way about—London Mail.

Largest Wire Cable

The largest wire cable in the world has been constructed for the suspension railway that is to be built to the summit of the Zugspitze in Bavaria. The cable is of one piece, 3,271 yards in length, 1.5 inches in diameter, and weighs about 58,000 pounds.

Rub the scalp with Minard's Liniment

WRIGLEYS
AFTER EVERY MEAL
THE FLAVOR LASTS
Probably one reason for the popularity of WRIGLEYS is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.
Fresh and full-flavored always in its wax-wrapped package.

Extra Funnels On Ships Are Useless

Only One Is Required To Carry Away Fumes

Many people are under the impression that the more funnels a ship has the faster she can steam. This is not the case, however.

Two liners have recently been fitted with three funnels each—to give them a more imposing appearance. There are many giant vessels afloat today carrying extra funnels that are nothing more or less than dummies, for modern engineering has proved it advantageous to bring all the "up-takes" from the boiler-rooms to one funnel only.

It is curious that motorships have at least one funnel. This is because the vessels contain boilers, although they are not used for creating steam to propel the ship. They are for the hot water systems and central heating. Some means have to be found for carrying away the fumes—hence the motor-ships are fitted with funnels.

An Oil that is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as its merits became known it had a wide content for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Predicts Aerial Cities

An amazing picture of future cities built far above the earth on platforms reached by tower elevators is presented by Frederick Kiesler, a prominent young Viennese architect. He predicts that houses in the future will be built on platforms supported by steel girders several hundred feet above the ground. They will be erected above beautiful gardens, shady forests, even above lakes and seas. Platforms will be erected, too, as landing places for aeroplanes, he believes.—Popular Science Monthly.

Genuine Aspirin Proved Safe

Take without Fear as Told

In "Bayer" Package

BAYER

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Tablets of Aspirin proved safe by millions and prescribed by physicians over twenty-five years for
Colds Headache
Nervous Lumbago
Toothache Rheumatism
Neuralgia Pain, Pain
It is a blinding royal servant may count on the mildest and most good humored rebuke, while a minister or state official who offends stands a good chance of a smart rap over the knuckles from "the highest quarter." With King Edward—keen statesman as he was—was a little odder, though, the other way about—London Mail.

MAY ESTABLISH A NEUTRAL ZONE IN THE BALKANS

Paris.—A neutral demilitarized zone between Greece and Bulgaria, with commissions of conciliation for the adjusting of all local conflicts in the Balkans, may be one of the fruits of the settlement of the Balkan crisis provided by the council of the League of Nations.

Giving a spur to the Balkans states' ambition to elaborate the security pact, the council will probably undertake to establish principles to guide the Balkan statesmen in handling any future difficulties, and will exert all possible influence to have the Locarno agreement with Germany supplemented not only by a Balkan arrangement, but also by security pacts between other sections of Europe.

This will hasten the convocation of a disarmament conference, which the Locarno protocol holds as one of the hoped-for results of the achievement of security.

The Balkan crisis, which came at the psychological moment in the new peace impulse given to European politics, has taken on international significance which entirely overshadows the conflict between Greece and Bulgaria. Four great powers, France, Great Britain, Italy and Japan, and six lesser powers, representing both the European and American continents, which together make up the membership of the council, solemnly registered their conviction and determination that henceforth conciliation and arbitration, and not the thunder of cannon, must be resorted to when disputes arise between states.

Statement of Trade

Very Encouraging

Report Shows Large Increase in Canada's Exports

Ottawa.—Canada's exports for the 12 months ended September 30 show an increase of \$8,937,119 in value as contrasted with a similar period ended September 30, 1924.

Canadian imports for the year ended September 30 also show an increase of \$8,157,225 as compared with the corresponding period ended September 30, 1924.

Total exports from Canada according to a report just issued by the Dominion bureau of statistics for the 12 months ending September 30, totalled \$118,520,739, as against \$1,073,463,570 for the corresponding period ended September 30, 1924. Total imports for the year ended September 30 last were valued at \$855,623,241 the report shows, against \$825,166,094 for the same period ended September 30, 1924.

Challenges Court Jurisdiction

Col. Mitchell Says Court Marital Has No Authority to Try Case

Washington.—After having secured the retirement of three members of the court marital chosen to try him, Col. William Mitchell challenged the jurisdiction of the court.

The colonel pleaded that the allegations against him did not constitute any offence falling properly under the articles of war, and that a court martial therefore was without authority to try the case.

Cargo of Reindeer

Ketchikan, Alaska.—When her engines failed the steamer, Nahsena, of the Alaska Steamship Company, rammed a wharf of the Ketchikan Wharf Company here, while stopping for water for 76 live reindeer the vessel was carrying.

Motorists Cause Loss To Railway

Chicago, Ill.—Losses to railways caused by motor competition are permanent, and will be multiplied with the completion of road-building programmes, W. B. Baldwin, president of the Missouri Pacific, testified before the inter-state commerce commission.

Accomplish Long Flight

Rome.—The Japanese aviators, Abe and Kawachi, who recently completed a flight from Tokyo to London, have arrived here.

W. N. U. 1901

May Be Message From Wrecked Coaster

Found in Bottle Off Wark Island

October 24
Vancouver.—What may prove to be a message from a man who died at sea nearly a year ago was picked up off Wark Island, Graham Beach, October 24.

D. Cordilla, of Butedale, which is Graham Beach, found a bottle containing a message, purporting to come from the lost coaster Hayport Number 2, which disappeared with all hands in Mill Bank Sound during a storm on January 28, 1923. The ship was proceeding north with a cargo of explosives for one of the northern mines with four men on board, Captain Partridge, Mate Addison, Engineer Polley, and a deck hand named Wood. She was last sighted in the storm heading to sea. Later, some wreckage was picked up, but no sign of the ship herself. And none of the bodies of those on board was ever recovered.

Mr. Cordilla reported that the note reads: "We are wrecked at Mill Bank Sound. No escape from drowning." (Signed) Steamer Hayport.

Disastrous Blaze In New Brunswick Village

Fourth in Four Years To Damage Business Section

Petrolia, N.B.—Fire for the fourth time in the last four years swept through a portion of the business section of this village and caused damage estimated at more than \$40,000. In spite of efforts of the volunteer fire force with buckets and hand pumps.

The fire, the origin of which is unknown, burned to the ground five stores and three houses and scorched several other buildings, including a hotel and two more stores.

The blaze raises the total of fire losses in the village to nearly half a million dollars in the last few years and each time it was the business section which was hit. Some of the structures burned have been built several times within a few years and were modern structures.

Campaign Under Difficulties

Peking.—The advance of General Sun Chuan-fang, the Choking leader, toward Haichow, in Northern Kiangsu, continues slowly, owing to the lack of rolling stock. The concentration of Marshal Chang Tso-lin's followers there is equally slow. Serious fighting in that region is not expected to occur for at least another week.

Remade Ancient Roadway

London.—The whole of Cornhill has just been closed for three weeks while an army of laborers, working day and night, remade the ancient roadway.

Running through the heart of London, from the Mansion House to Leadenhall Street, Cornhill has from the days of the Romans been one of the main arteries of the city.

U. S. Apple Crop

Washington.—The apple crop of the United States this year was forecast by the department of agriculture as 164,000,000 bushels, compared with 179,000,000 last year. In making public the figures the department observed that the average person consumes half an apple a day.

Variable Weather in London

London.—Within ten minutes, in one day, recently the London hotel and shopping district experienced hail, sleet, rain, lightning and thunder—but no fog.

Many visitors here have been disappointed when informed that the real fogs occur only in winter.

U. S. Navy Celebrates

Washington.—The United States navy recently celebrated its 150th birthday with expressions of optimism and official assurances that the morale of the nation's first line of defense is still high, and that its leaders are looking toward the future, undismayed by past events.

Secures Largest Moose

Frederickton, N.B.—E. C. Rogers, of Putnam, Conn., has secured the largest moose head taken out of New Brunswick forests during the 1925 hunting season. The antlers had a spread of 61 inches. Mr. Rogers obtained his trophy in the Dunn Mountain district on the Miramichi.

WHEAT POOL WOULD ACQUIRE MORE ELEVATORS

Regina.—The following statement has been issued by officials of the Saskatchewan Wheat Pool:

"A step which it is expected will have far-reaching consequence for the future of the association was taken by the delegates of the Saskatchewan Wheat Pool at their annual meeting held recently when they decided after a full discussion, that authority be given to the board to enter into negotiations with the Saskatchewan Co-operative Elevator Company with a view to acquiring their elevator system at the earliest possible date."

"One of the objectives of the pool since the early stages of organization has been the acquiring of its own facilities for the purpose of handling its members' grain. The first step in this objective was taken at the extraordinary meeting of delegates held in February when the incorporation of the Saskatchewan Pool Elevators Limited was confirmed, and the board of directors was instructed to acquire elevators at points in Saskatchewan not already served by the Farmers' Companies, where 10,000 or more wheat acres had been signed up under contract to the pool. A further step was taken when it was decided that elevators should also be acquired at shipping stations served by the Farmers' Companies where the pool controlled 50,000 or more wheat acres. Under this policy 85 elevators have either been purchased or erected and are in operation for the 1925 crop."

Advocate Germicide Surgery

Use Amply Justified Says American College of Surgeons

Philadelphia.—A movement that may result in the abolition of the use of the knife in all minor and some major operations was taken at the fifteenth annual congress of the American College of Surgeons.

The board of regents of the college decided to inaugurate at the centennial of the birth of Lord Lister, organizer of antiseptic and germicide surgery, next April, a campaign of research and propaganda for the development and more universal use of those germicides which attack diseased cells in the body without destroying healthy tissues. The board resolved that the use of such germicides instead of the knife had already been amply justified, and also that the profession should know more about the new technique.

If a man had an internal abscess, speakers said, the only treatment had been the knife. It was pointed out that a germicide had been discovered which would destroy the abscess cells and leave the living tissues unharmed.

Good Season For Whalers

Seattle.—With a season's take of 10,000 barrels of whale oil from Bering Sea, off the coast of Northeastern Siberia, the steamer Koomanashoren I, mother ship of the Voss Whaling Company, of Sandefjord, Norway, accompanied by four steam whalers, has arrived here. The fleet, the first in several years to hunt whales off the Siberian coast, operated under a concession from the Russian government.

Diplomat Sails On "Empress Of Canada"

Great Britain's minister to Chile, Sir Ronald MacLay, and party photographed on board the Canadian Pacific S.S. Empress of Canada, prior to sailing from Vancouver for the Orient recently.

Mr. B. O. Newton, on the left, and Colonel the Hon. Sydney Peel, on the right, grandson of the famous Sir Robert Peel and son of the late Viscount Peel, at one time speaker in the House of Commons, will act as delegates with Sir Ronald at the forthcoming Chinese customs tariff conference, opening in Peking on October 26.

The ladies in the group are Lady Della Peel, centre, and Lady MacLay on her left.

New French Cabinet

Name of M. Caillaux Does Not Appear in the List

Paris.—Premier Poincaré has succeeded in completing a cabinet which is satisfactory to everybody. M. Poincaré takes over the portfolio of minister of finance. Aristide Briand retains the post of foreign minister. Other portfolios were distributed as follows:

Minister of Justice—M. Chaumet.
Minister of the Interior—M. Schrameck.
Minister of Works—M. De Monzie.
Minister of War—M. Daladier.
Minister of Marine—Emile Berol.
Minister of Commerce—M. Chautau.

Minister of Agriculture—Jean Durand.
Minister of Instruction—M. Delphes.
Minister of the Colonies—Paul Morel.

Minister of Labor—M. Durafour.
Minister of Pensions—M. Anierion.
The under-secretaries are understood not to have been changed, and the new combination tends slightly more to the left than the former cabinet.

It is significant that the name of M. Caillaux, minister of finance in the cabinet just dissolved, and the man who precipitated the present crisis because of his proposals on debt adjustment and currency devaluation, does not appear in the new ministerial list.

Seed Cleaning Plant

Saskatchewan Registered Seed Growers Lease Plant at Moose Jaw

Regina.—Unanimous approval of the proposal made by the directors of the Saskatchewan Registered Seed Growers' Association, to lease the Moose Jaw plant for a year with an option to purchase has been given by the shareholders voting.

The association will open the plant this week, when cars of wheat, oats, barley and flax will begin arriving at the plant to be cleaned and inspected for registration by the Canadian Seed Growers' Association.

E. G. Booth, M.S.A., has been appointed superintendent of the plant which has a capacity of 250,000 bushels. W. E. Walker, B.S.A., will be the Dominion seed inspector at the plant. M. P. Tullis, manager for the association, said the plant would also accept custom cleaning for farmers in the Moose Jaw district at a nominal fee.

Complete Extension To Plant

Saskatoon.—While we would not care to commit ourselves to a definite statement right away, we would not have bought property to provide for an extension of the present plant had the extension not been contemplated, said Thomas Reynolds, local manager for the Quaker Oats Company, when questioned as to the possibility of an extension to the company's plant this year.

Hugo Stinnes Son Comes To U. S.

Berlin.—Tired of family quarrels and squabbles with bankers and receivers of the remnants of the family fortune, Dr. Edmund Stinnes, eldest son of the late Hugo Stinnes, industrial magnate, has secretly embarked for the United States. His unexpected departure, friends say, represents a determination by young Stinnes to seek a new business environment.

Debaters Defeat Oxford

Philadelphia, Pa.—Upholding the affirmative of the question, "Resolved, that this house favors the principle of prohibition," University of Pennsylvania debaters team defeated Oxford University.

EXPLANATION OF FATAL RIOTING IN DAMASCUS

Alexandria, Egypt.—Reports that the fatal rioting in Damascus was caused by the action of the French in exhibiting bodies of rebels executed in the neighborhood of the city, is reiterated by refugee Syrians arriving here from Beirut.

The leader of the revolt was a Mohammedan chief named Hassan El Kharrat who entered Damascus at the head of a mixed force of Mohammedans and Druse tribesmen. Hassan sent cries throughout the city urging people to remain in their houses, and had stationed a police post in the Chagour Jasser.

Next he moved against posts in Medan and Bab Tuma, the Christian quarter. The French forces and their families withdrew to the Nezi and Bab-ee-Sghayreh quarters in the north of the city, and opened a bombardment on the Chagour, Medan and Baberg quarters, which are densely populated. Shells fell every three minutes, incendiary and high explosive. The bombardment lasted 48 hours.

A delegation of notables approached General Gamelin and appealed for a cessation of the bombardment, since the rioters had evacuated the towns and their relatives. General Gamelin, the refugee declares, replied that he would not cease firing and the bombardment continued a further six hours.

Toronto Honors Robert J. Fleming

Street Traffic Suspended Two Minutes During Funeral Service

Toronto.—Toronto's street traffic ceased for two minutes and many people stood in the snow-covered streets with bare feet bowed down when the funeral service of one of the city's favorite sons, Robert J. Fleming, street railway magnate, was held at the Timothy Eaton Memorial Church.

Scanned was the city of Toronto's witness to a great demonstration of mourning in connection with the death of one of its citizens.

From 12:30 to 2:30 o'clock the body lay in state at the church and hundreds of people passed to pay their last respects.

The body was interred in Mount Pleasant cemetery.

A Turkish Phenomenon

Constantinople.—Inevitable patriotic Turks are making pilgrimages to the home on the Bosphorus of a poor peasant couple, to whom has been born a son with a birth-mark on his right leg said to resemble Turkey's national emblem, the crescent and star. Believers say this is a certain sign of future greatness. The phenomenon has also excited the Turkish medical world.

Alberta By-Elections

Edmonton.—Six by-elections are to be held in Alberta about December 26, to fill vacancies in the provincial house caused by six members becoming candidates in the Dominion election. Announcement of the decision to hold by-elections rather than a general election, was made by Premier Greenfield last week.

Coal From Germany

Poitland, Maine.—A cargo of 4,000 tons of German coal, said to be the first to be imported into this country since the war, is due to arrive here in about five weeks. It was announced by local dealers, who are seeking to relieve the fuel shortage in Maine. The coal will come in three sizes, stove, egg and nut, and will be priced about the same as Welsh coal.

Discover Deposit Of Potash Salts

Fredericton, New Brunswick.—Deposits of potash salts of an exceptional quality are reported to have been struck at a depth of 500 yards at Buddington, about three years ago. The discovery, established by the government of Canada, was established three years ago.

Debaters Defeat Oxford

Philadelphia, Pa.—Upholding the affirmative of the question, "Resolved, that this house favors the principle of prohibition," University of Pennsylvania debaters team defeated Oxford University.

Interesting Announcement

Word comes from Montreal that
that great family and farm paper
The Family Herald and Weekly
Star has been enabled to reduce
its subscription price to One Dollar
a year. This certainly will be in-
teresting news in every Canadian
home where the Family Herald is
known and to many who will
avail themselves of the offer. At
Two Dollars a year The Family
Herald and Weekly Star was gen-
erally admitted to be good value,
in fact, far value, but when re-
duced to One Dollar a year it will cer-
tainly be the marvel of the news-
paper world.

Canada is proud of that great
Weekly, and has every reason to
be so, as it has no superior and few
equals in the world today. The
Publishers announce that notwith-
standing the change in price every
feature will not only be maintain-
ed but improvements will follow.
The Publishers are fortunate in
being in a financial position to do
this, and Canadian homes will
have the advantage. When the
new rate is made known it cer-
tainly will bring a rush of sub-
scribers to the Family Herald.
One Dollar is a small amount for
such a newspaper.

British Journalists Give Impressions of Canada

Having completed a ten-thousand-mile tour of Canada, from coast to coast and return at the invitation of E. W. Peary, chairman and president of the Canadian Pacific Railway, ten British journalists representing papers from London, Western England, Wales, Glasgow and Belfast, now broadcast to Canadians their views of the Dominion. These journalists were asked to come to this

Messrs A J Shaul and A Propp head another party of hunters in to the foothills for big game.

Garden Valley schoolhouse was filled Friday night, on the occasion of the Halloween dance there. There was good music, and everyone had a good time.

Glory Hills School Board met Saturday last with Geo Webber in the chair. Tenders for the erection of a new 2-roomed school house to replace the one recently destroyed by fire, were opened. Four contractors had tenders in, and the contract was awarded to Mr. Carl Strasse, at the price of \$3150.

On the evening of Sunday, Nov 15, Prof Rehwick M A and B D will lecture in Ducholke's Hall taking for his subject "Lutheran Missions in Alberta"

The local Boy Scouts are planning to hold a concert in the near future, with all the participants to be taken from their ranks.

Hen fruit has become so scarce in Stony, the local Chick is trying an eggless recipe for his ham and orders.

The Klushin-Namniatzeff-Sporocochon lawsuit on a land deal is up for a hearing in the Supreme Court, in Edmonton, this week.

Farmers in the province who intend exhibiting seed grain at the International Hay and Grain Show at Chicago in November are reminded that their entries should be in the hands of officials of the Department of Agriculture at Edmonton at once, in order that they may be in the proper hands at Chicago in plenty of time. The actual exhibits should be shipped to the Provincial Seed Cleaning Plant at Edmonton for shipment to Chicago.

Terbaker-Chawers in B. C.

Ever since women have become a factor in politics a certain pink-tea atmosphere has been creeping in. But in the campaign just closed, so far as can be ascertained, not one single politician has been asked whether he took one lump or two. Many of our leading political lights have not even taken the wad of chewing tobacco out of their cheeks since the campaign opened.—Vancouver Sun.

MASQUERADE DANCE!

ROSENTHAL HALL

Tuesday, Nov. 10th.

BARTH'S ORCHESTRA.

EVERYBODY WELCOME!

Duffield Briefs.

Mrs Vansiever, who farms one mile south of Duffield, intends holding a clearance sale of stock and implements very shortly.

Mr Chas Smith, the Edmonton cattle buyer, picked up a car of stock in this district this week.

Mr Geo Tyrrell is installing a three-tube Deforest Radio set at his residence.

Mr T W Vansiever, the well-known cutlerman, is taking treatment in an Edmonton hospital for Bright's disease.

Mr Percy Fawcett reports great success with his new 5-tube Deforest Radio, WEA-F, WOCE, KPO, WCCO, KGO, all coming in easily. Friday Percs heard, plainly a concert broadcasted from Puerto Rico.

The Flower of Remembrance.

In Canada the two holidays, Thanksgiving and Armistice Day fall so close that at present it is arranged for both days to be celebrated together. This is not the best plan possible for it is natural that Armistice Day is being lost in the long fixed habit of Thanksgiving.

We would therefore specially draw Armistice Day to your mind. If you wear one of these special poppies on the 11th you remind yourself that our present normal life is being lived thanks to all who offered their lives during the war years 1914-1918. You not only remind yourself of this fact but you remind every person you meet.

Do you remember why poppies were chosen as the flower of remembrance? "In Flanders Field the Poppies grow". They grow and have grown in wild profusion year by year for centuries; and they continued to grow after the fields became burial grounds for those who offered their lives for Freedom's sake. They grow—patches large and small, like living memories of the blood shed amongst them, and not one man who fought in Belgium will ever forget the sight. Hence they were the flower chosen by which we remember our dead friends there.

The biggest memorial we can offer to the dead is to remember their fellows who still live. There are hundreds of these of every color and race and of almost every country in the world who came back from the war to a life wrecked in health and prospects. Hundreds still require help and hospital or medical care. All the money which is collected from the sale of these poppies goes to assist in this work. But even so the call for help is far in excess of the funds which are raised. You are therefore asked to give generously in this cause. The poppies will be sold at 10c and 25c each according to size. Will you please give the exact money you wish to donate and we put it into the sealed tin. No change can be given and none of the helpers of this cause desire to handle any money.

Local Organizer of Poppy Day
Isabel M Elliot.

Here and There

In last fiscal year 3,243 bushels of wheat were planted in the Prairie Provinces, aggregating an approximate area of 614,830 acres, while, in addition, 710 soldier grants of 113,400 acres, make up a grand total of 728,450 acres so settled.

In 1915 Canada exported no wheat to China. In 1918 she sent only eight bushels to Japan. In 1924 China imported over 5,000,000 bushels of Canadian wheat and over 1,500,000 barrels of flour, while Japan took 7,000,000 bushels of wheat and 110,000 barrels of flour. It is predicted these figures will be well beaten for the current year.

The Grand Challenge Cup, emblematic of the First Aid Championship of the entire system of the Canadian Pacific Railway, will be competed for at the Place Viger Hotel, Montreal, November 15. The champions in a knock-out competition among Eastern and Western teams respectively, will fight it out for the trophy.

Plans are already being laid to make the 1925 Eastern International Dogged Derby an even greater success than in any previous year, and it is reported that the prize money will be considerably increased next winter with the object of attracting more teams and members from the West and the United States.

Fire Prevention Week, October 4-10, was observed throughout the Dominion, and to mark the sense of the importance of the occasion Mr. Grant Hall, vice-president of the Canadian Pacific Railway, broadcast an appeal by wire to every officer and employee of the system "to co-operate as in the past and as a good example by thoroughly cleaning up all premises."

Canada's great outlook, says a recent issue of the London Outlook, is that it wants more people, but of the right type, namely, steady agricultural workers with enterprise, initiative and endurance. Enthusiastic letters from emigrants under the joint scheme of settling 3,000 families in Canada are bound to have their healthy effect on relatives and friends disaffected with their lot in England.

E. F. L. Murdoch, general Passenger Agent for the Orient of the C.P.R., with headquarters at Hong Kong, has been appointed Assistant General Passenger Agent of the system at Montreal. His duties commenced here in October. He was relieved of his other post owing to ill-health, but the climate of Canada soon restored him to physical well-being. He has a long record of service with the C.P.R., dating back to his first appointment at Saint John in 1894.

Sixty bushels of wheat at every tick of the clock is the rate at which the Canadian Pacific Railway have carried the grain into the elevators this season. To keep up this unprecedented rush, it has been necessary to move one car-load of grain out of Winnipeg at every one minute and twenty-three seconds of the twenty-four hour day. Grain delivered at the head of the stacks by the Canadian Pacific in September alone would fill a fleet of 200 ships, each with a cargo of 200,000 bushels.

Back from an extended tour of inspection over the company's western lines, E. W. Healey, chairman and president of the Canadian Pacific Railway, found a very marked improvement in the West as compared with that which had existed when he last went across the country. He thought the spirits of the people was much more optimistic and with very good reason since he considered it safe to say that 380,000,000 bushels was not too high an estimate for the total Canadian wheat yield this year. He noticed throughout the country a sustained interest in immigration and a more general realization that therein lay the soundest remedy for most of Canada's difficulties.
